

# AIR SANITISER

by Scent Central

## Kill Airborne Bacteria, Pathogens and Fungi

- Bacteria Eradication
- Removal of Pathogens
- Anti-Viral
- Odour Control
- Allergy Prevention
- Air Sanitisation

### Mimic the qualities of Hand Sanitiser in the air

Our air sanitising option combines essential oils with naturally derived disinfectants to sterilise the air and successfully neutralise the spread of bacteria. Our alcohol and allergen free air sanitiser is diffused as cold compressed air particles, in a fine mist, to **attack bacteria, fungi and pathogens successfully**. This unique composition in the form of micro droplets uses citric acid to dehydrate the water content of the bacteria's nucleus to then kill the harmful bacteria, pathogen or fungi<sup>1</sup>.

### Clinically Proven Results

Unlike other simple masking agents, this citric acid based disinfectant combines natural compounds of essential oils, glycerin and sodium citrate. These ingredients have been proven to be **99% effective at killing bacteria** microbial colonies<sup>2</sup>. Other research has found that such disinfectant ingredients are effective against many pathogens such as<sup>1</sup>:

- Trichophyton (Tinea)
- Influenza Virus
- E. Coli - O 157
- P,Gingivalis
- Salmonella
- Staph.Aureus

### Why you should use Air Sanitiser by Scent Central?

- Inexpensive and fully serviced, not constrained by the vast limitations of air filtration.
- Stops the spread of airborne bacteria by dehydrating bacteria particles.
- Uses essential oils and naturally sourced disinfectants to neutralise strains of bacteria and pathogens.
- Protects from the bacteria formation that traditional cleaners can't control.

### Application Areas

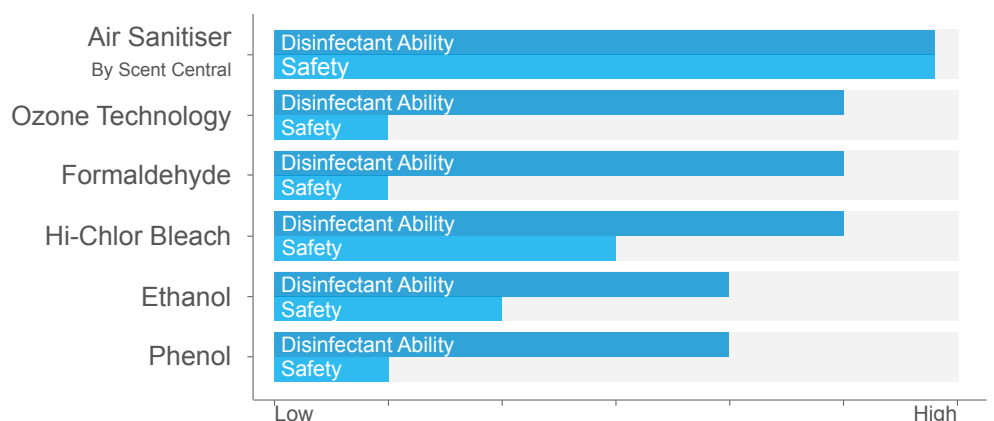

- Lobby/Entrance Areas
- Medical Practices & Aged Care
- Bars, Restaurants, Pubs & Clubs
- Retail & Shopping Centres
- Commercial Properties
- Hotels & Apartments
- Fitness Centres & Gyms
- Offices, Schools & Universities
- Spas & Salons
- Theatres & Cinemas
- Airports & Public Transport

**"The majority of clinically contagious pathogens are killed within 30 seconds"**

*Data as per tests conducted and certified (No 20-04633 by Osaka Prefectural Industrial Research Agency)*

### Disinfectant Ability and Safety Comparison

The Air Sanitiser has significant advantages when compared to many other well known products on the market. The disinfectant ability of the product combined with the safe fully serviced application means that you can expect a sterile environment free from bacteria and pathogens.

# Air Sanitiser

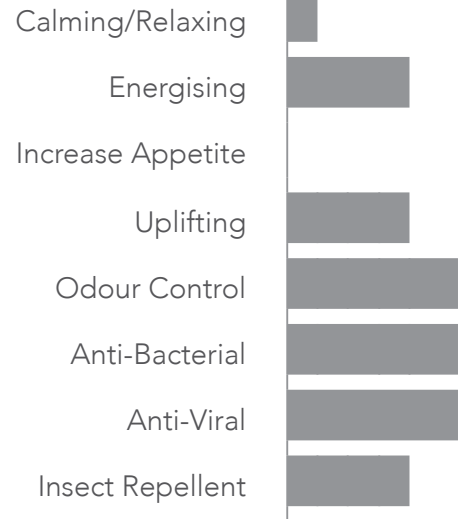

## “Kill bacteria and pathogens in 30 Seconds”

Data as per tests conducted and certified (No 20-04633 by Osaka Prefectural Industrial Research Agency)

### The Sanitising Aroma...

Our fresh and natural fragrance combines cool refreshing top notes of lemongrass and orange blossom with a middle note of eucalyptus and a herbal base note of rosewood to enhance energy and mood. The natural essential oils of eucalyptus and lemongrass act as a great insect repellent and are known to be anti-bacterial superstars<sup>3</sup>. The unique aroma is rounded out by the distinct, odourless, naturally derived, non-toxic disinfectants of glycerine and citric acid that have been clinically proven to **kill the majority of bacteria, pathogens and fungi within 30 seconds**<sup>2</sup>.

### Diffusion Options & Units

Our range of fragrance units use patented technology to diffuse fragrances and air sanitisers into the air. With systems to suit both small and large areas our units are ideal for many different locations. All units are installed and serviced by our experienced team of dedicated technicians in your area.

We have the ability to either diffuse the bacteria killing aroma as well as other fragrances either into your ducted air-conditioning or through the use of a wall-mounted unit.

#### HVAC Diffusion

Fine cold compressed air particles are diffused directly into the supply air duct after the cooling fan.

#### Wall-Mounted Diffusion

A unit is mounted approximately at a height of 2m in a location dictated by airflow. The aroma is then diffused directly into the environment.

### Specifications (Model Dependent)

- Suitable Models: SC005, SC007
- Dimensions: Varies
- Weight: 2.2 - 6.3kg
- Colour: Black or White
- Volume: <60DBA
- Capacity: 700 - 1000ml
- Coverage: 100SQM - 1000SQM
- Input Voltage: 100-240 V AC
- Input Frequency: 50/60 Hz
- Output: DC12V
- Electric Consumption: 9.5 - 18 W
- Plug: Country-specific

### Is it safe for the environment?

Scent Centrals Air Sanitiser is made from a range of organic and naturally derived ingredients. All ingredients are sourced organically and responsibly with no animal testing. Our natural product effectively kills bacteria while still remaining friendly to the environment, humans and pets.
